

SMP Pharmacy Solutions Achieves ACHC Accreditation
Pharmacy becomes PCAB Accredited for its compounding services

Miami, Fla. – June 2, 2016 – SMP Pharmacy Solutions proudly announces its achievement of PCAB accreditation, a service of Accreditation Commission for Health Care (ACHC), for the services of patient specific prescriptions of sterile and non-sterile compounds. SMP, a leading national specialty pharmacy, is recognized for its commitment to meeting and/or exceeding national quality standards.

Achieving accreditation is a process where healthcare organizations demonstrate compliance with national standards. PCAB accreditation reflects an organization's dedication and commitment to meeting standards that facilitate a higher level of performance and patient care.

"Everyone at SMP has worked hard to deliver the highest quality compounded medications to the South Florida community, and we are honored to have that recognized by ACHC," said Armando Bardisa, President & Founder of SMP Pharmacy Solutions. "By achieving PCAB Accreditation, our customers can be assured that we offer the best in personalized patient care staying true to the industry's best practices and standards."

Compounding medications are an integral part of the practice of pharmacy and the demand for these customized medications increases every year. SMP's Compounding Department was created in 2007 in an effort to offer patients a larger variety of specialty services.

Established in 2007, PCAB was founded by eight of the nation's leading pharmacy organizations to create voluntary quality accreditation designation for the compounding industry. The organization promotes, develops, and maintains principles, policies and standards for improving the quality of pharmacy compounding nationwide. In 2014, PCAB accreditation became a service of Accreditation Commission for Health Care (ACHC), whereby ACHC administers the PCAB accreditation program. For more information about PCAB accreditation, visit www.achc.org/program/pharmacy.
